Company Overview

MELBOURNE'S PREMIER COMMERCIAL & INDUSTRIAL PLUMBING FIRM

East Plumbing Co is a Melbourne-based commercial and industrial plumbing company specialising in factories, warehouses, hospitality venues, and complex commercial buildings across Victoria.

With over 55 years of combined experience across our senior leadership team and more than 10,000 completed projects ranging from small scale works to large enterprise development, the company has established itself as a trusted partner for some of Australia's most recognised brands and property managers.

Operating from Braeside, our team of 20+ qualified plumbers delivers specialist plumbing solutions built on relationships, reliability, and results.

Mission

Specialising in innovative, commercial, residential and industrial plumbing and roofing solutions, our team of reliable and experienced professionals is committed to delivering bespoke, collaborative solutions tailored to each project. We prioritise building strong relationships with our clients and ensuring a supportive, safe and positive work environment for all our staff at East Plumbing Co.

Vision

To set new standards in the plumbing and roofing industry, improving efficiency, quality and safety.

CORE VALUES

01

EXPERIENCED LEADERS

We are experienced and a leader. With over 55 years of combined experience across our senior leadership team and more than 10,000 completed projects across Victoria's commercial and industrial sectors, we bring depth of knowledge that only comes from hands-on practice. Our leadership team, led by Managing Directors Nathan Brodie and Danny Pitman, has delivered solutions across healthcare, retail, education, hospitality, and manufacturing.

02

RELIABLE & PERSONABLE

We are consistent, reliable and personable. Reliability means being there when clients need us, 24/7 emergency response with 90-minute arrival times across Melbourne. Consistency means delivering the same high standard on every project, which is why we've achieved a 10/10 client feedback score. But we're also approachable, easy to work with, and committed to building relationships. Most of our clients come from word-of-mouth referrals.

03

SOLUTION SEEKERS

We are highly skilled and solution seeking. Our team holds comprehensive licensing across plumbing, gas fitting, roof plumbing, and fire protection. But technical skill is only part of the equation, we're systematic problem-solvers. From complex leak investigations to innovative pump station installations, we invest in diagnostic equipment and methodical approaches that find root causes, not just symptoms.

04

PROFESSIONAL & HUMBLE

We are professional, yet humble. Professionalism defines how we operate, licensed, insured, punctual, and accountable. We communicate clearly, deliver on commitments, and maintain the highest standards on every site. But we're also humble. We don't oversell or overpromise. We listen carefully, acknowledge what we don't know, and focus on delivering quality work rather than making big claims.

05

TEAM FOCUSED

We work as a team. From project managers and estimators to site foremen and apprentices, every person at East Plumbing Co plays a vital role. We support each other, share knowledge across the team, and create a safe, positive work environment where people can grow. That teamwork extends to our clients, we collaborate closely, communicate openly, and approach every project as a partnership.

06

COMMUNITY COMMITTED

We are committed to the communities we serve. From volunteering with the Reece Foundation on the Dampier Peninsula project bringing clean water to remote Indigenous communities, to building infrastructure for FareShare's urban farm in Dingley Village, we believe in using our skills to give back. Supporting our communities isn't just good business, it's the right thing to do.

BUILT ON RELATIONSHIPS, DELIVERED THROUGH EXPERTISE

East Plumbing Co was established to address a clear need in Melbourne's commercial sector: a specialist plumbing partner capable of delivering the technical depth, rapid response, and operational understanding that industrial and commercial clients demand.

Operating from our Braeside facility, we have built long-term client relationships through a strong focus on end-to-end customer service, responsive communication, and reliable project delivery. Our growth has been driven by structured processes, accurate estimating capabilities, and a relationship-first approach that allows us to consistently support, retain, and grow our client partnerships across the commercial and industrial sectors.

OUR LEADERSHIP

Managing Directors Nathan Brodie and Danny Pitman lead our team with complementary expertise. Danny brings 33 years of hands-on experience across residential, commercial, healthcare, retail, and education sectors, including high-profile work as a plumbing collaborator on 'The Block'. Nathan contributes over 13 years of strategic project management and commercial leadership, ensuring complex projects are delivered on time with exceptional quality. This leadership depth is supported by project managers, estimators, site foremen, and qualified plumbers who bring specialised knowledge to every commercial and industrial environment.

HOW WE'VE GROWN

Since we've established partnerships with major property managers, construction firms, and industrial clients across Melbourne. Vicinity Centres trusts us for facility management and tenancy delivery at Frankston and Cranbourne Park. Greystar Australia relies on us for hydraulic and roofing maintenance across their Build to Rent portfolio. The Boat Rack Williamstown engaged us for complete hydraulic and fire service packages. Our client base spans hospitality groups like Marriott Hotels and View Hotels, industrial operations including United Petroleum and Lion Group, and construction partners such as Buildcorp and Alchemy Constructions.

SERVICES OFFERED

Commercial and industrial plumbing solutions across Melbourne

Commercial

COMMERCIAL PLUMBING

Complex system installations and programmed maintenance for retail, office, and hospitality sectors. From tenant fitouts and bathroom facilities to complete hydraulic infrastructure for multi-level buildings, we deliver plumbing systems designed for high-usage commercial environments.

Industrial

INDUSTRIAL PLUMBING

Heavy-duty pipework and system management for factories, manufacturing plants, and warehouses. Our industrial capabilities include process water systems, large-capacity drainage, wash-down areas, and robust infrastructure built to withstand demanding operational conditions.

Roofing

COMMERCIAL ROOF PLUMBING

Large-scale roof plumbing installations, repairs, and rainwater management systems. We specialise in Colorbond roofing, box gutter installations and repairs, downpipe systems, and stormwater infrastructure for commercial properties across Melbourne.

Safety

FIRE SERVICES

Installation, repair, and emergency fire services for commercial properties. We deliver sprinkler systems, hydrants, and hose reels with full compliance documentation, ensuring critical fire protection infrastructure operates reliably when it matters most.

Infrastructure

SEWER & STORMWATER

Deep sewer repairs, system cleaning, stormwater renewal, and confined space services when required. From blocked drainage and CCTV inspections to sewer rehabilitation and stormwater upgrades, we help prevent costly system failures and keep wastewater systems operating efficiently.

Utilities

HOT WATER SERVICES

High-capacity commercial hot water system installation and repair. We work with hotels, gyms, healthcare facilities, restaurants, and industrial sites that require continuous hot water supply throughout operational hours.

Utilities

GAS FITTING & REPAIR

Commercial and industrial gas line services, fitting, and compliance. Our licensed gas fitters handle everything from new installations and appliance connections to emergency gas leak response and system upgrades.

Maintenance

PROGRAMMED MAINTENANCE

Tailored bi-annual or custom-schedule maintenance to prevent catastrophic facility failures. Our maintenance programmes include pump servicing, CCTV drain inspections, backflow testing, grease trap cleaning, and proactive component replacement based on each facility's specific operational needs.

KEY PROJECTS AND CAPABILITIES

East Plumbing Co has successfully delivered end-to-end plumbing services across commercial, industrial, and roofing sectors.

Our expertise covers everything from emergency repairs to large-scale system installations, ensuring safety, efficiency, and regulatory compliance.

Capabilities include:

Full-service commercial and industrial plumbing installations for new developments and facility expansions

Emergency plumbing services with 90-minute response times to minimise operational downtime

Commercial roof plumbing installations, repairs, and stormwater management systems

Preventative maintenance programmes for commercial and industrial clients to prevent costly system failures

Fire protection services including installation, repair, and emergency response

Hot water system installation and repair for high-capacity commercial applications

Trade waste management, grease trap services, and regulatory compliance support

Select residential projects for larger developments and complex installations requiring commercial-grade capabilities

MAJOR COMMERCIAL PROJECTS

East Plumbing Co brings robust technical expertise to commercial and industrial projects. Our experience ensures that plumbing systems support operational efficiency whilst meeting stringent safety and environmental standards.

Key commercial and industrial projects:

The Boat Rack Williamstown – Hydraulic, Civil & Fire Package

Complete hydraulic, civil, and fire service infrastructure for innovative multi-level facility. Water main and sewer main connections to authority points, coordinating with relevant authorities for street connections. New fire service infrastructure including fire hydrants and fire hose reels extending to the floating pier. Stormwater and oil/petrol treatment plants with pump systems. Civil pits, stormwater services, rising sewer main, and complete bathroom and kitchen fitouts.

NAB Bank Headquarters Office Fitout – Richmond

Builder: Built

Complete hydraulic package including fixtures and Zip units for corporate headquarters. Structural under-slab works for sewer drains with reinstatement including reo, mesh, and concrete. Hot and cold water distribution throughout tenancy. Fixture installations for commercial kitchens and bathrooms. Hot water service plant installation.

Botanical Gardens Re-Roofing – Heritage Buildings

Client: Melbourne City Council
Builder: Barefoot

Heritage building roofing restoration for Melbourne's historic botanical gardens. Specialised works maintaining heritage architectural requirements whilst upgrading roofing infrastructure for long-term protection.

The Boat Rack Williamstown – Roofing & Cladding Package

Large-scale commercial roofing installation including 1,000 square metres of Colorbond Ultra roof sheeting and 2,000 square metres of Colorbond Ultra wall cladding. Installation of 80 linear metres of stainless steel box gutters. Boom lift operations over 14 metres. Architectural design custom capping, flashing, and wall cladding systems with purlin installation.

Abbotsford Apartment Block – Hydraulic & Gas

Builder: Duratec

57-unit residential development with 40 apartments requiring complete hydraulic and gas services. Bathroom, kitchen, and laundry rough-in and fitoff across all units. Installation of hot water ring main servicing four levels. 120 core holes through concrete floors with fireproofing for all penetrations. Gas testing and comprehensive compliance safety audit.

Greystar Maintenance Contract – The Gladstone Apartments, South Melbourne

Ongoing maintenance partnership delivering hydraulic and roofing services for Build to Rent residential portfolio. Programmed and reactive maintenance ensuring reliable building services for tenant satisfaction and property protection.

Bayside Shopping Centre Re-Roof

Client: Vicinity Centres

Supply and install new Colorbond Ultra roof and cladding for active shopping centre. Removal of existing solar panels and deteriorating aluminium roof requiring careful handling. Crane lift operations with necessary permits. Project delivered within live retail environment requiring comprehensive traffic and pedestrian management protocols.

Riverside Skate Park Cottage Re-Roofing – Heritage Buildings

Client: Melbourne City Council
Builder: Barefoot

Heritage building restoration including 350 square metres of Mackwave 21 galvanised sheeting installation. Galvanised cappings and flashings with structural roofing upgrades. Lead flashing details maintaining heritage requirements. Proctor ventilation system installation with custom metal downpipes.

Systematic Investigation & Diagnostics

CCTV drain inspection equipment, leak detection technology, and methodical approaches that identify root causes rather than treating symptoms.

After-Hours & Minimal Disruption Scheduling

Strategic planning and early-morning access ensuring plumbing work happens without affecting business operations or tenant activities.

Multi-Tenancy Coordination

Experience managing plumbing projects in active shopping centres, office buildings, and mixed-use developments where multiple stakeholders require coordination.

Compliance Documentation

Detailed service reports, CCTV footage, compliance certification, and maintenance schedules supporting asset management and regulatory requirements.

Preventative Maintenance Programmes

Tailored inspection schedules, proactive component replacement, and systematic servicing preventing emergency failures across commercial facilities.

COMPLIANCE, SAFETY & CERTIFICATIONS

East Plumbing Co maintains comprehensive licensing, insurance, and certification to operate across Victoria's commercial, industrial, and roofing sectors. Our team holds current registrations with the Victorian Building Authority, gas fitting licences, fire services certification, and backflow prevention testing credentials. We carry full public liability, workers compensation, and professional indemnity insurance. Every project is delivered in compliance with the Victorian Building Code, OHS/WHS requirements, and relevant safety standards. Our commitment to compliance protects our team, our clients, and their facilities whilst ensuring reliable, professional service on every site.

EQUIPMENT AND TECHNOLOGY

Solving complex commercial and industrial plumbing challenges requires more than experience, it requires the right diagnostic tools, systematic approaches, and investment in technology that identifies root causes rather than treating symptoms.

East Plumbing Co invests in advanced equipment and methodical

investigation processes that deliver permanent solutions, prevent recurring problems, and minimise disruption to business operations.

ADVANCED DIAGNOSTIC TECHNOLOGY

CCTV Drain Inspection Equipment

CCTV Drain Inspection Equipment High-resolution camera systems for inspecting underground drainage, sewer lines, and stormwater infrastructure. Our CCTV capabilities identify blockages, structural damage, root intrusion, and deterioration without excavation, enabling targeted repairs and informed decision-making for commercial facilities.

Excavation & Laser Levelling Equipment

Advanced excavation and laser levelling equipment designed for precision earthworks, site preparation, and grading applications. These technologies improve accuracy across residential, commercial, and large scale civil projects, reducing manual rework and ensuring efficient project delivery.

High-Pressure Water Jetting

Commercial-grade high-pressure water jetting equipment for clearing stubborn blockages, grease build-up, and debris from commercial drainage systems. Delivers effective cleaning without damaging pipes, suitable for restaurants, shopping centres, and industrial facilities.

Pipe Location & Tracing Equipment

Electronic pipe locators and tracing equipment identifying underground services, preventing accidental damage during excavation and enabling precise targeting of repairs in complex commercial sites.

SPECIALISED INSTALLATION EQUIPMENT

Confined Spaces Capability & Equipment

Specialised equipment and safety systems for confined space access, maintenance, inspections, and underground works across commercial and industrial environments. Our capabilities include below-ground access, sewer and stormwater infrastructure works, safety compliance procedures, and coordinated confined space operations when required.

Concrete Cutting & Core Drilling Coordination

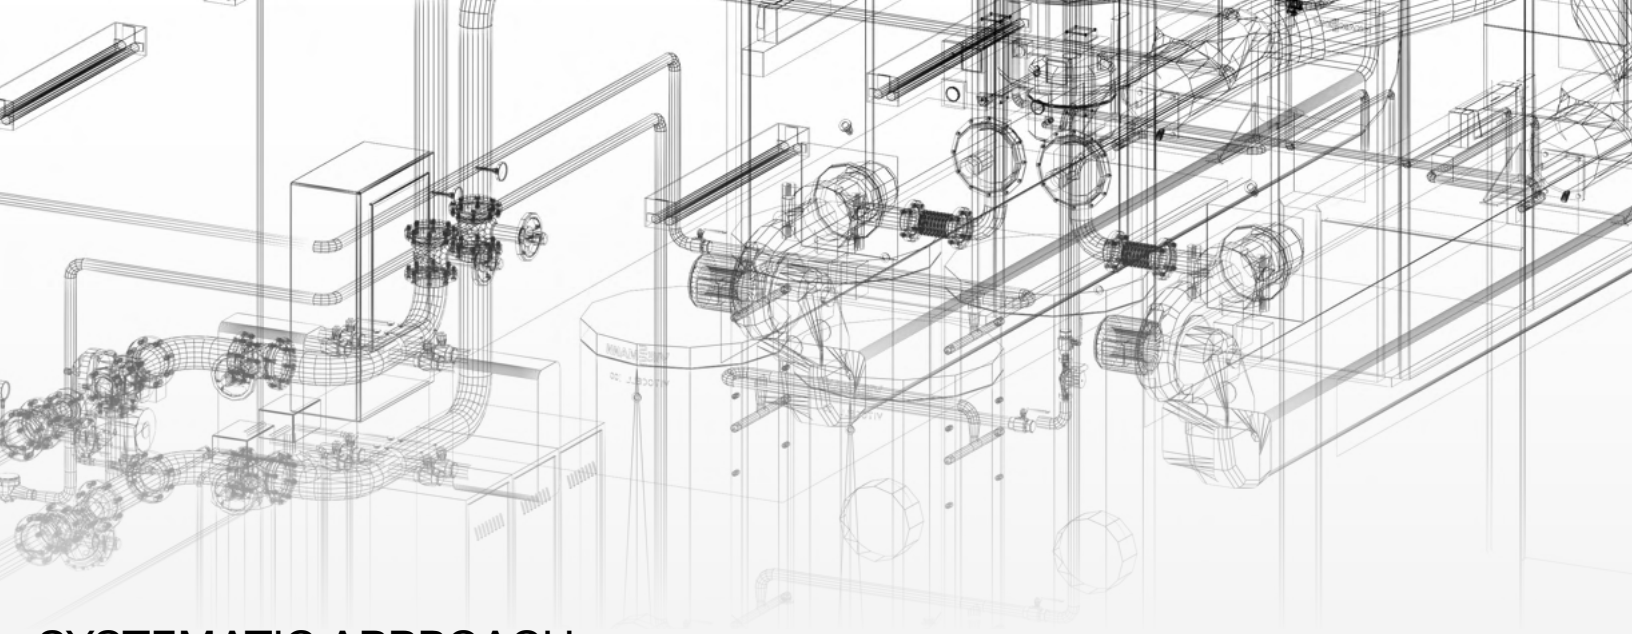

Coordination of trusted concrete cutting and core drilling specialists to support plumbing installations, infrastructure upgrades, and access requirements. We manage the process to ensure works are completed efficiently, safely, and with minimal disruption to existing structures.

Roof Access & Safety Equipment

Comprehensive roof access equipment, fall protection systems, and safety gear enabling our team to work safely on commercial roofs for Colorbond installations, box gutter repairs, and stormwater system upgrades.

Gas Testing & Detection Equipment

Calibrated gas detection equipment for leak testing, commissioning, and safety verification across commercial and industrial gas installations, ensuring system integrity and regulatory compliance.

SYSTEMATIC APPROACH

Methodical Investigation Processes

Beyond equipment, our approach emphasises systematic investigation, gathering information, forming hypotheses, testing theories, and verifying root causes. This methodology prevents guesswork and delivers solutions that address underlying problems rather than surface symptoms.

Documentation & Reporting

Digital documentation systems capturing CCTV footage, test results, site photos, and inspection findings. This creates comprehensive records supporting client asset management, regulatory compliance, and future maintenance planning.

Preventative Technology

Regular CCTV inspections, pressure testing, and system monitoring identify potential failures before they become emergencies, enabling proactive maintenance and protecting business continuity.

Design & Construct Collaboration

We work closely with business owners, architects, builders, and project stakeholders from the early planning stages to deliver tailored plumbing solutions aligned with operational requirements, budgets, and construction timelines. Our collaborative Design & Construct approach enables proactive problem-solving, streamlined communication, and efficient project delivery from concept through to completion.

Project Management & Digital Systems

Supported by in-house project management processes and technology-driven systems, we maintain clear communication, transparent documentation, and consistent project oversight across every stage of delivery. Our digital workflows, reporting systems, and operational procedures help ensure efficiency, accountability, innovation, and long-term consistency across commercial and industrial projects.

WHY TECHNOLOGY INVESTMENT MATTERS

For commercial and industrial clients, the right diagnostic technology translates directly to:

Faster Problem Resolution

Identifying root causes in hours rather than days or weeks, minimising operational disruption and reducing investigation costs.

Informed Decision-Making

CCTV footage and diagnostic data provide visual evidence supporting repair recommendations, enabling clients to make informed decisions about infrastructure investment.

Targeted Repairs

Pinpointing exact problem locations enables focused repairs without unnecessary excavation or invasive work, reducing project costs and site disruption.

Preventative Capabilities

Regular inspections using diagnostic technology identify developing issues before they cause emergency failures, protecting operations and reducing long-term maintenance costs.

TEAM AND EXPERTISE

Behind every successful commercial plumbing project is a team of qualified professionals bringing specialised expertise to complex challenges. East Plumbing Co's team includes project managers, estimators, site foremen, licensed plumbers, and apprentices, each contributing essential skills to our commercial, industrial, and roofing operations.

SERVICE COVERAGE AREA

East Plumbing Co delivers commercial, industrial, and roofing plumbing services across Melbourne's metropolitan area and surrounding regions. Operating from our Braeside facility, we provide 24/7 emergency response, scheduled maintenance, and complete plumbing installations throughout Victoria.

Our extensive service coverage ensures rapid response times and local knowledge across diverse commercial and industrial sectors.

Inner Melbourne

Eastern Suburbs

South-Eastern Suburbs

Bayside

Western Suburbs

Northern Suburbs

North-Eastern Suburbs

REGIONAL VICTORIA

Beyond Melbourne's metropolitan area, we service regional Victoria for commercial and industrial projects, including Geelong, Ballarat, Bendigo, and surrounding areas. Contact us to discuss specific regional requirements and project locations.

24/7 EMERGENCY COVERAGE

Our emergency plumbing service operates across all Melbourne metropolitan areas with 90-minute response times. When commercial or industrial facilities experience urgent plumbing failures, our qualified plumbers are on call around the clock to minimise operational disruption.

COMPETITIVE ADVANTAGES

01

COMMERCIAL & INDUSTRIAL SPECIALISTS

Our team focuses on commercial, industrial, and roofing plumbing. We understand multi-tenancy challenges, compliance frameworks, operational constraints, and stakeholder coordination that define complex commercial environments.

02

TRUE 24/7 EMERGENCY CAPABILITY

Genuine round-the-clock availability with target 90-minute response times across Melbourne. Operational reliability when plumbing failures threaten business operations.

03

SYSTEMATIC PROBLEM-SOLVING APPROACH

CCTV drain inspections, leak detection technology, and methodical investigation identify root causes, not just symptoms. We aim to solve properly the first time, reducing recurring issues and unnecessary costs.

04

PREVENTATIVE MAINTENANCE PARTNERSHIPS

Proactive maintenance partnerships reduce emergency callouts and extend equipment lifespan. Scheduled inspections, pump servicing, and planned component replacement help create predictable budgets and minimise disruption.

05

MINIMAL DISRUPTION OPERATIONS

After-hours scheduling, early-morning access, and careful planning allow plumbing works to be completed with minimal impact on business operations. Shopping centres, manufacturing facilities, and office buildings can continue operating while works are completed.

06

COMPREHENSIVE DOCUMENTATION

Detailed service reports, CCTV footage, compliance certification, and as-built records are provided where applicable. Professional documentation supports asset management, regulatory compliance, and informed decision-making.

07

RELATIONSHIP-DRIVEN SERVICE

Most clients come through word-of-mouth referrals. Transparent communication, reliable delivery, and honest recommendations help build long-term partnerships, with consistent service quality across every interaction.

08

COMMUNITY COMMITMENT BEYOND COMMERCIAL WORK

Beyond commercial projects, our team volunteers on community infrastructure initiatives, including remote Indigenous water access projects and urban farm plumbing systems, using our skills where they make a genuine impact.

TRUSTED BY INDUSTRY LEADERS

East Plumbing Co has established trusted partnerships with leading property managers, construction firms, hospitality groups, and industrial operators across Melbourne. Our client relationships reflect consistent delivery, professional service, and a genuine commitment to protecting business operations.

Maintenance & Support

PROACTIVE MAINTENANCE BUILT AROUND YOUR OPERATIONS

Preventative maintenance protects commercial and industrial facilities from costly emergency failures. East Plumbing Co delivers tailored maintenance programmes designed to keep plumbing systems operating reliably while minimising disruption to business operations.

PROGRAMMED MAINTENANCE SERVICES

Scheduled Inspections

Regular site visits and system inspections identify potential issues before they become emergencies. Tailored schedules are developed based on facility requirements and operational demands.

Pump & Pit Servicing

Comprehensive pump station maintenance including inspection, cleaning, testing, and component replacement to help prevent failures in below-ground systems critical to facility operations.

CCTV Drain Inspections

Periodic drainage inspections using high-resolution cameras identify blockages, structural damage, and deterioration enabling proactive repairs and informed infrastructure planning.

Grease Trap Services

Scheduled cleaning, pumping, and inspection for hospitality and food production facilities helping maintain compliance and prevent drainage system failures.

Backflow Prevention Testing

Annual testing and certification of backflow prevention devices, ensuring water supply protection and regulatory compliance for commercial properties.

Hot Water System Maintenance

Regular servicing of commercial hot water systems including safety inspections, efficiency checks, and component replacement. Prevents failures in high-demand environments.

Fire Services Maintenance

Inspection and repair of fire protection systems including hydrants, and hose reels. Ensures critical safety infrastructure operates reliably.

Gas System Inspections

Periodic leak testing, safety verification, and compliance checks for commercial and industrial gas installations. Protects facilities and occupants.

MAINTENANCE PROGRAMME BENEFITS

Reduced Emergency Callouts

Extended Equipment Lifespan

Predictable Budgets

Regulatory Compliance

Operational Continuity

GROWING WITH MELBOURNE'S COMMERCIAL AND INDUSTRIAL SECTOR

East Plumbing Co continues to expand its service capability and geographic reach across Victoria. The company is investing in team development, advanced equipment, and new specialisations to meet the growing demand from commercial construction, property management, and industrial operations.

With a strong pipeline of repeat clients and an expanding portfolio of major construction partnerships, East Plumbing Co is positioned to scale its maintenance contracts and emergency service coverage across wider Victorian regions.

STRATEGIC GROWTH AREAS

- Commercial & Industrial Sector Expansion
- Enhanced Preventative Maintenance Programmes
